Virtual Event Studio is our new online planning tool where you can view Backdrop Fantastic's unique theme backdrops in a virtual room setting with the option to change the drape & table linen colour scheme with the click of a mouse.

After creating your perfect Virtual Event setting, the image can be saved to your computer to include in presentations for clients, co-workers or committee members.

Above are some great examples of the Virtual Event Studio and below are images from the actual events.

Experience the **ultimate** in theme backdrops!

Many of our theme backdrops are available as panoramic room sets.

When hung next to each other around a room the backdrops produce an impressive seamless environment that is adaptable to any venue.

Sectional Backdrops Explained

Backdrop consists of 3 separate detachable sections

(Ties & sleeve pockets are also detachable sections)

Sectional Backdrops are ideal for use in different types of venues since they are adjustable to fit exactly the height required. Backdrop Sections are joined to each other with heavy duty zippers that attach along the top and bottom of each backdrop section. Joining the sections together is quick and easy and once joined the seam line is barely perceptible. The backdrops are designed such that no matter the height option chosen, the image on the front of the drop is never compromised.

Below is an example of a Sectional Backdrop at different heights
